EXAMINER'S AMENDMENT

1. The following is an examiner's statement of reasons for allowance: the prior art does not teach or fairly suggest a plasma display panel, comprising, in combination with the remaining features of the claims, a scan driver for supplying a rising ramp waveform in a set-up interval and a falling ramp waveform in a set-down interval; a temperature sensor for sensing a driving temperature of the panel to generate a bit control signal; and a set-down/set-up control signal generator for generating a control signal such that an application time of the falling/rising ramp waveform can be controlled in correspondence with the bit control signal and for applying the control signal to the scan driver (claims 1,7, and 13); differently setting an application time of the falling ramp waveform applied to the scan electrode at a high temperature and at a temperature less than the high temperature (claim 20); differently setting an application time of the rising ramp waveform applied to the scan electrode at a low temperature and at a temperature more than the low temperature (claim 23).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Vu whose telephone number is (571) 272-1831.
